

**June 2011**

## Beautiful Brow, Beautiful You Brow Shaping Will Bring Your Beauty to a New Level

Eyebrow shaping takes your appearance to a new level of beauty. A well-groomed brow line creates the subtle difference that will affect the overall look of your entire face.

**Brow Shape Enhances**

A good place to start is with the natural shape of your eyebrows. Let the natural shape your eyebrow guide you should not try to change them completely. Thickness is also a consideration when determining the correct eyebrow shape. Ideally, the impact of your eyebrows should balance with the rest of your face and hair. If you have thick hair with larger facial features, your eyebrows should be thicker and more dramatic. If you have thin hair and petite features, your eyebrows should be more subtle.

**Get Your Eyes Noticed**

Eyebrow shaping can easily be overdone, remember less is truly better. Thin eyebrows tend to make your face look instantly older. Ultimately the point of eye-

brow shaping is to adjust the viewer's focus away from your eyebrows, to your eyes instead.

While it is not preferred to completely change your eyebrow structure, you can make minor changes to what nature recommended in order to

alter some eye appearances. For example, remove a few extra hairs from your eyebrows at the starting point to make close-set eyes appear wider.
